

Hydroschuh Weiss FRONT SHOVEL and BLADE SUPPORT

example: for BACKHOE LOADER +excavators

(Ensure sufficient distance between shovel/blade and basic unit)

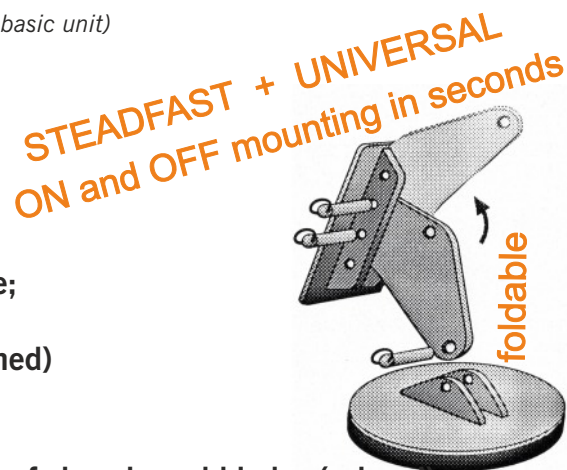

KIT-TYPE 290/10 - consisting of:

- a.) 2 pieces Hydroschuh - 290/0
dimension Ø 290 mm / height 35 mm
profiled rubber part vulcanised onto steel plate;
with 15 mm rubber around
with 2 strap to bolting the mounting arm (primed)
- b.) 2 pieces Basic Bracket for shovel
with 4 holes; for welding on all common types of shovels and blades (primed)
- c.) 2 pieces mounting arm - 290/3
with 4 hoels; adjustable (primed)
- d.) 6 pieces plug in pin - 290/5
complete with security chain + locking pin (galvanized)

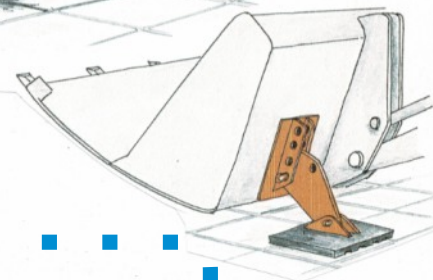

load capacity / pair: < 12 t

*if the excavator are 4 times supported,
the vehicle stands more safety during work,
the **PERFORMANCE INCREASE!!!***

during pushing and loading work the Hydroschuh can be folded up by using the adjustable swing arm; and can therefore remain on the shovel!

no more "damages" on roads + surfaces (asphalt)

If you are interested, it is a pleasure for us to hear from you!
